Builds enterprise applications, integration services, and secure deployments at Cisco. Developing agentic AI for finance discovery and incident resolution.

6+	**4**	**50%**
years at Cisco	enterprise web apps	lower application load time

EXPERIENCE

Cisco Systems | Bengaluru, India

Software Engineer 3 Nov 2023 to Present

- Develop the Finance Discovery Workbench (ongoing) with LangGraph, LangChain, and Next.js to validate requirements and generate analysis and solution documents grounded in a finance knowledge hub and team product catalogs.
- Support human review, stakeholder feedback, and handoff to coding agents; reduction in analysis drafting time: [XX%].
- Develop an agent to automate resolution of dynamic incidents in the team queue (ongoing), with a second agent analyzing feedback to refine incident handling; reduction in manual resolution effort: [XX%].
- Develop and maintain 4 Angular applications backed by Node.js and deployed on OpenShift, supporting enterprise workflows.
- Build [N] MuleSoft APIs and services for multiple teams to consume and publish data and synchronize replication across databases and Snowflake.
- Harden containerized deployments using Chainguard images and address reported security vulnerabilities.
- Migrated a legacy Struts application for reseller data management to the MEAN stack, reducing load times by 50%.

Software Engineer 2 Jun 2021 to Nov 2023

- Built REST APIs for booking and reseller management and delivered critical system integrations using MuleSoft.
- Developed a REST API for a BERT model to classify incidents and suggest resolutions.

Software Engineer Aug 2020 to Jun 2021

- Optimized Spring MVC services, reducing response times by 20%, and built a centralized dashboard for monitoring integration services.

TECHNICAL SKILLS

AI and automation: LangGraph, LangChain, agentic workflows, human review, Python, UiPath
Applications: Angular, Next.js, Node.js, Spring Boot, Flask
Integration and data: MuleSoft, REST APIs, Kafka, Snowflake, MongoDB, Oracle, Redis
Delivery and observability: OpenShift, Docker, Chainguard, Jenkins, Spinnaker, Splunk, ELK

EDUCATION

Bachelor of Technology in Computer Science | MAHE, Karnataka | 2016 to 2020
CGPA: 8.78 | Minor specialization: Big Data
